

Want your voice heard?

it's time

2016

GP Survival is the leading online grassroots movements for GPs in the UK

We use the flexibility, reach and responsiveness of social media to stay connected and alert to developments that may threaten primary care

To strengthen our aims we welcome GPs affiliated with LMCs, LHBs, CHPs, universities and the RCGP but will remain an independent voice from the coal face

Join us to share your ideas and local developments, and debate the issues with GPs at the cutting edge of policy and education
